

Martin Bogoje

Web developer, MSc student in computing at FER

Zagreb, Croatia / +385 99 7900 441 / bogojemartin@gmail.com
bogojemartin.com / github.com/MartinWeb2003

Software developer with experience at Ericsson Nikola Tesla and seven client projects running in production, mostly tourism and real estate on the Pelješac peninsula. I bring the engineering discipline of a large system to independent work, and I build sites to be fast, clear and visible in search.

EXPERIENCE

Software Developer, Ericsson Nikola Tesla Apr 2025 - Nov 2025
Student position

- Delivered software modules meeting strict enterprise quality standards.
- Applied Git workflow and agile methods to sustain a high delivery velocity.
- Took part in code review and in optimising existing functionality.
- Worked alongside senior engineers on the architecture of long-term solutions.

Freelance Web Developer, independent projects 2023 - present
Self-employed

- Full-stack development:** React and Vite for custom applications, WordPress and PHP where the client edits content themselves.
- Technical SEO and performance:** structured data, multilingual hreflang, prerendering, Core Web Vitals.
- Project ownership:** every phase independently, from requirements through delivery and maintenance.
- Client work:** advising on technology and scope, direct communication throughout.
